THE AQUAPOTS™ SOLUTION

Developed by Award-Winning Landscape Architect Jack Barnwell

Available this Spring
at Quality Pottery & Pottery Fiesta,

Southern Arizona's exclusive distributors
for Michael Carr Designs®

A Stylish Solution That Really Works

AquaPots are an exceptional, patent pending concept in self-watering containers invented by award-winning landscape architect Jack Barnwell of Barnwell Landscape and Garden. As an avid user of Michael Carr Designs Pottery, Barnwell saw the need for gorgeous, commercial grade, self-watering containers for the variety of properties he services across the country. He worked with Michael Carr to develop this stylish yet practical solution for his clients.

Debuting in Spring 2020, AquaPots are the first and only premium quality glazed ceramic self-watering pots on the market. They are not an insert but rather a complete system that is integrated right into each container. AquaPots are handcrafted by artisans at Michael Carr Designs Pottery of Vietnam, a favorite luxury brand among home gardeners. The pots are crafted using time tested techniques and an old-world kiln that gives each piece its own special character.

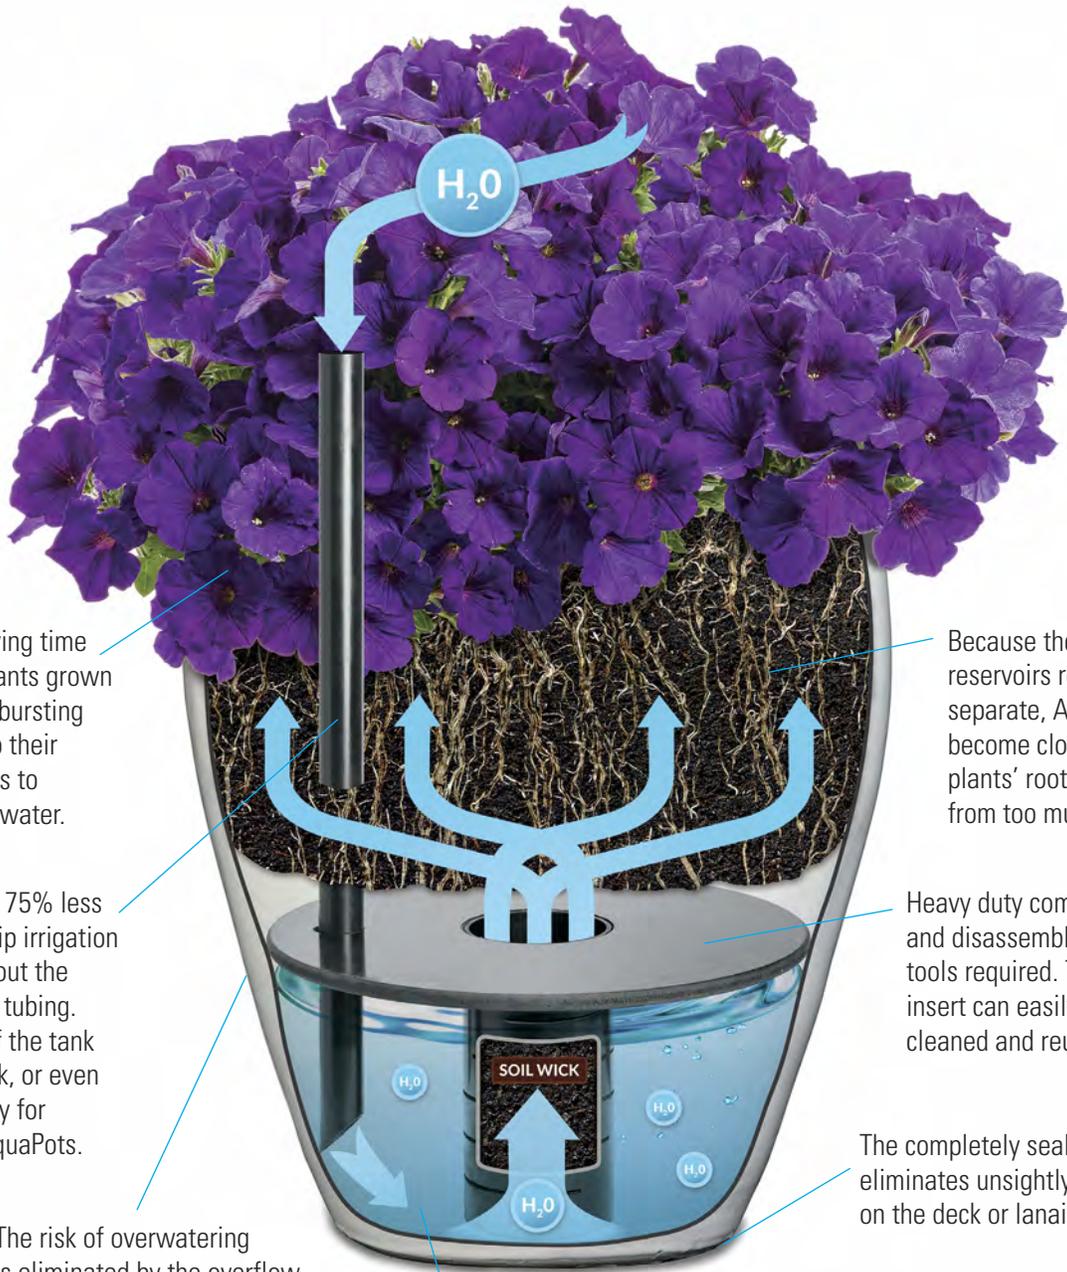

Brought to You by Proven Winners®

The same brand that brought you some of your best selling plants like 'Limelight' hydrangeas, Wine & Roses® weigela and Supertunia Vista® Bubblegum petunias has entered into the pottery market with the debut of AquaPots by Michael Carr Designs Pottery. Premium quality pottery is a natural extension of the brand. The goal of Proven Winners remains consistent across all product lines – to bring beautiful, high performance solutions to market.

KEY BENEFITS OF AQUAPOTS™

Smart. Stylish. Sensational.

While you're saving time and labor, the plants grown in AquaPots are bursting with vigor due to their consistent access to nutrient-infused water.

Because the soil and water reservoirs remain completely separate, AquaPots won't become clogged and the plants' roots won't suffocate from too much moisture.

AquaPots use 75% less water than drip irrigation systems without the hassle of drip tubing. Simply top off the tank once per week, or even less frequently for extra-large AquaPots.

Heavy duty components assemble and disassemble easily with no tools required. The self-watering insert can easily be taken apart, cleaned and reused year after year.

The risk of overwatering is eliminated by the overflow valve. Even in heavy rain, the valve maintains the proper water level in the pot.

The completely sealed pot eliminates unsightly staining on the deck or lanai surface.

Nutrient-infused water continually feeds the plants without any runoff or waste. Simply add two scoops of Proven Winners Premium Continuous Release Plant Food to the fill tube at the time of planting and it will continue to feed for up to six months.
